December 2023, Rabat, Morocco – The WHO Regional Office for the Eastern Mediterranean ran a 2-day training programme in Rabat, Morocco, to strengthen the risk assessment capacities of the Moroccan Ministry of Health.

Experts from the WHO Regional Office, WHO Country Office in Morocco and Ministry of Health facilitated the training.

The training equipped Ministry of Health personnel with the knowledge and skills to detect, risk assess, notify and respond to health risks and acute health emergencies. This was done through presentations and simulation exercises that let participants hone a readiness to mitigate the impacts of real-life public health emergencies.
