Influenza activity by sub-type

- In June 2017, no new cases of influenza A(H5N1) were reported in Egypt.
- In the northern Africa influenza transmission zone, during the month of June 2017, Egypt and Morocco reported no influenza activity.
 - In the western Asia influenza transmission zone, Oman and Qatar reported circulation of all seasonal influenza subtypes with predominance of A(H1N1)pdm09. Saudi Arabia reported circulation of influenza A(H1N1)pdm09 and influenza B.
 - In the southern Asia transmission zone, Islamic Republic of Iran reported circulation of sporadic cases of influenza A(H1N1)pdm09 (Fig. 2).

Circulating influenza viruses by subtype

- Regional national influenza centres and influenza laboratories tested a total of 1434 specimens for influenza viruses in June 2017. Of these, 285 tested positive.
- The average percentage of positivity rates is 8.1%, with highest positivity rate recorded in Oman, Qatar and Saudi Arabia. The lowest rates were recorded in Egypt, Iraq, Morocco and occupied Palestinian territory.
- Of the viruses tested, 228 (80%) were influenza A viruses and 57 (20%) were influenza B viruses (Fig. 3). Of the sub-typed influenza A viruses, 121 (42%) were influenza A(H1N1)pdm09 viruses and 7 (3%) were influenza A(H3) viruses.
