

## [Substance use atlas 2021](#)

Publication date: 2023

The Substance use atlas 2021 reports on progress made in the implementation of the regional framework for action to strengthen the public health response to substance use. The atlas maps the resources and capacities of the countries of the Region to respond to the problems of substance use. It also highlights challenges and gaps and identifies areas where the public health response to substance use problems needs to be strengthened. The atlas provides aggregated regional information and individual country profiles with detailed information on available resources and capacities at the country level.
