

The report on the Regional IMCI Coordinator's meeting held in Sana'a, Yemen, 6–9 December 2010 is now available for downloading. The report covers progress in under-five mortality reduction and implementation of IMCI in countries in the Region, work on child health country profiles, interventions to increase access to quality child health care, especially through community-based health providers and mobile teams, progress in IMCI pre-service education, updates on regional work and on the “Countdown to 2015: [news item](#) Tracking progress in maternal, newborn and child survival” initiative, indicators on infant and child feeding practices and the child health financial situation. A summarizing the meeting was also posted on this web site in December 2010.
