

As of 04 September 2023, the global cumulative incidence of COVID-19 reached 771,896,387 reported cases and 6,997,275 associated deaths with a case-fatality ratio (CFR) of 0.91%. Meanwhile, the Eastern Mediterranean Region (EMR) has reported a total of 23,403,257 cases representing 3.03% of the global count, with 351,721 associated deaths (CFR 1.5%). Most countries in the Region are in the community transmission phase. This report does not represent the accurate COVID-19 burden in the EMR given that updates are not regularly received from all 22 Member States (Table 1).

Indicator	Cumulative	Week 39	Week 40	Week 41	Week 42	Week 43	Week 44	Weekly Trend
Cases	771896387	157735	163721	148056	138941	139325	137694	
Deaths	6997275	2369	2086	1765	2595	998	842

Table 1: COVID-19 cases, deaths, and CFR, global and EMR, as of 04 September 2023

During the epidemiological week 44 of 2023, a total of 1,284 lab-confirmed COVID-19 cases and 56 associated deaths (CFR: 4.4%) were reported from 4 Member States: Afghanistan (330 cases; 3 death), IR Iran (934 cases; 53 deaths), and Kuwait (15 cases; 0 death). This indicates 22% decrease and 10% increase in the number of cases and deaths respectively compared to week 43.

A to

WHO Support to the Member States of the Region

The regional incident management support team (IMST) continues to coordinate the response and provide technical support to the Member States and partners in the Region in the areas of coordination and partnership, surveillance, laboratory capacity, clinical management, infection prevention and control, risk communication and community

engagement, points of entry according to the International Health Regulations (2005), research, health systems, and essential health services among others. Furthermore, COVID-19 vaccination continues to be provided across the Region. The total number of doses administered as of 04 September 2023 in the 22 Member States is 902,548,908 and the average coverage of fully vaccinated population in the Region is 51%. The highest coverage rate of complete primary series was reported from the UAE (98%), followed by Qatar (97%), and Kuwait (77%) while the lowest coverage rate was reported by Yemen (3%) followed by Syria (13%) and Libya (18%), (Figure 2).

tal of 88,284 COVID-19 PCR tests were conducted this week in the 2 Member States (Positivity Rate: 1.5%) which indicates 8% increase in the number of tests compared to the previous week. This brings the cumulative number of COVID-19 laboratory tests in EMR to 450,050,288 (positivity rate 5.2%) since the start of the pandemic. The highest number of PCR tests were reported from the United Arab Emirates (UAE) (200,761,593; 44.7%), followed by IR Iran (57,792,227; 12.8%), and Saudi Arabia (45,484,848; 10.1%). WHO recommends a positivity rate of around 3–12% as a general benchmark indicating adequate testing, which was achieved in most countries of the Region.

Since the beginning of the pandemic, the highest number of total cases in the Region was reported by IR Iran (7,623,061; 32.56% of the Region's total), followed by Iraq (2,465,545; 10.54%), and Jordan (1,746,997; 7.47%). IR Iran also reported the highest number of total COVID-19- associated deaths (146,633; 41.69% of the Region's total) followed by Pakistan (30,656; 8.72%) and Tunisia (29,423; CFR 8.37%). The lowest CFRs in the region were reported by Qatar (0.13%), Bahrain (0.22), and the UAE (0.22%), while the highest CFRs were reported by Yemen (18.07%) followed by Sudan (7.89%) and Syria (5.51%) respectively.

For more data from the Region, please visit the COVID-19 dashboard.

\*The data on vaccination is obtained from several sources including media reports and country websites for ministries of health.

\* We are currently reporting on weekly relative differences instead of cumulative differences to better reflect the extent of the COVID-19 pandemic as we are witnessing a decline in the reported cases. In addition, to a change in the frequency and quality of data sharing, countries started to move to weekly aggregate data, and less information is shared by the monthly infectious hazard preparedness newsletter of WHO's Health Emergencies Programme for the latest data and analysis on the epidemic- and [Subscribe](#) countries. pandemic-prone diseases, as well as news on outbreak preparedness and response within WHO's Eastern Mediterranean Region.
