21.7 % of the population is aged 65 years and over, compared to 12.4% in 2015. The population is expected to continue to age rapidly, with the proportion of the population aged 65 years and over projected to reach 27.7% by 2050.

The region is also experiencing a rapid increase in the number of people aged 65 years and over. The number of people aged 65 years and over is projected to increase from 45 million in 2015 to 110 million in 2050. This increase is driven by a combination of factors, including a decline in fertility, an increase in life expectancy, and a reduction in mortality rates among the elderly population.

This trend is expected to continue, with the number of people aged 65 years and over projected to reach 155 million by 2050.

In 2015, 44% of the population was aged 0-14 years, compared to 32% in 2020. The number of children aged 0-14 years is projected to decline from 59 million in 2015 to 40 million in 2025.

The region is also experiencing a rapid increase in the number of people aged 65 years and over. The number of people aged 65 years and over is projected to increase from 45 million in 2015 to 110 million in 2050. This increase is driven by a combination of factors, including a decline in fertility, an increase in life expectancy, and a reduction in mortality rates among the elderly population.
