

Photo credit: WHO/Banan Kharabsheh 25–29 October 2016, Dead Sea, Jordan – The Global Outbreak Alert and Response Network (GOARN) is a global technical partnership, coordinated by WHO. For several years, GOARN has provided expertise and technical resources globally for field investigation of and response to public health emergencies.

During major disease outbreaks, GOARN ensures that the right technical expertise and skills are promptly deployed when national capacities are overwhelmed and an international response operation is needed.

GOARN is a collaboration of existing institutions and networks, constantly alert and ready to respond. The network pools human and technical resources for rapid identification, confirmation and response to outbreaks of international importance. Photo credit: Peta-Anne Zimmerman The GOARN outbreak response training brings together participants from GOARN partner institutions in Bangladesh, Egypt, France, Germany, Islamic Republic of Iran, Jordan, Kenya, Lebanon, Malaysia, Morocco, Pakistan, Portugal, Saudi Arabia, Senegal, Switzerland, Tunisia,

United Arab Emirates and United Kingdom.

This 5-day scenario-based training aims to simulate the technical and operational challenges in field conditions, putting participants' skills into practice, and ultimately resulting in technically proficient and experienced field teams ready for international deployment. The training is expected to contribute enhancing operational readiness of WHO and partners for international outbreak response in the Eastern Mediterranean Region.
