Highlights

- During week 45, a total of 69 new cases of cholera and 1 death were reported from 11 districts of Banadir region. No case was reported from any other areas.

- Since December 2017, a total of 9,111 cumulative cases, including 47 deaths (CFR 0.5%), were reported from 3 states of Somalia (Hirshabelle, Jubbaland and South West state) and Banadir region.

- Since December 2017 a cumulative attack rate of 207 cases per 100,000 population was reported with Kismayo (Jubbaland) and Daynile (Banadir) being the most affected.

- Though the overall case-fatality rate (CFR) was 0.5%, higher rates were observed in Daynile, Waberi, Karan and Kurtunwarey districts exceeding the WHO’s threshold of <1%.

- Of the 834 stool samples tested for culture since December 2017, 165 exceeding the WHO’s threshold of <1% were positive for Vibrio cholerae, O1 serotype Ogawa.

- Culture and sensitivity tests performed at the central public health laboratory in Mogadishu, show that the Vibrio cholerae, O1 serotype Ogawa is sensitive to chloramphenicol and tetracycline but resistant to ampicillin and nalidixic acid.

Cholera cases, deaths and case-fatality rates by state of Somalia, December 2017 to 10 November 2019

- Since December 2017, a cumulative attack rate of 207 cases per 100,000 population was reported with Kismayo (Jubbaland) and Daynile (Banadir) being the most affected.

- Though the overall case-fatality rate (CFR) was 0.5%, higher rates were observed in Daynile, Waberi, Karan and Kurtunwarey districts exceeding the WHO’s threshold of <1%.

- Of the 834 stool samples tested for culture since December 2017, 165 exceeding the WHO’s threshold of <1% were positive for Vibrio cholerae, O1 serotype Ogawa.

- Culture and sensitivity tests performed at the central public health laboratory in Mogadishu, show that the Vibrio cholerae, O1 serotype Ogawa is sensitive to chloramphenicol and tetracycline but resistant to ampicillin and nalidixic acid.

Suspected cholera cases, attack rate, deaths and case fatality rate by district (December 2017 to 10 November 2019)

**Summary statistics**

- **69** new cases of cholera were reported during week **45**, of which **48 (69.5%)** were children under **5 years of age**.

- **9,111** cumulative cases including **47** deaths were reported since December 2017 of which **5,226** were children under **5 years of age** and **4,375** cases were in females.

- **2,350** cumulative cases of cholera and 1 death were reported in 2019.
