Questions				Time	Responsi	Reso	urce requireme	ent
	findings	goal	ities in sequence	Fram e	bility	HR	Training	Funds
B1 – Organization and functioning of the civil registration and	d vital statistics sy	ystems;	•					
B1.1 What are the organizational and administrative								
arrangements of the civil registration and								
vital statistics systems (reviewed using the prepared diagrams)?								
B1.2 What have been the main changes in the functioning of								
the systems over the last 10 years?								
B1.3 How have these changes affected functioning of the								
system or systems?								
B1.4 What areas need improvement?								
B1.5 What are the current communication mechanisms between								
the civil registration authority								
and others involved in the collection and production of vital								
statistics?								
B1.6 Are there any areas where the responsibilities for specific								
functions overlap or are unclear?								
B1.7 Are national, state or provincial and local responsibilities								
clearly defined?								
B1.8 Are there any areas where bottlenecks regularly occur?								
B1.9 Review in detail the country's practices for birth and								
death registration. Which types of								
births and deaths are likely to escape the civil registration								
system?								
B1.10 Are these types of births and deaths also missed by the								
vital statistics system?								
B1.11 Are there some vital events that cannot be registered								
through the normal system?								
B1.12 Are the same data on births and deaths collected across								

Questions	Assessment	Improvement	Actions/activ	Time	Responsi	Reso	urce requireme	ent
	findings	goal	ities in sequence	Fram e	bility	HR	Training	Funds
the country and at every level of								
the system (including state or provincial, national and local								
levels)?								
B1.13 Is there an entity responsible for national vital statistics								
standards and coordination?								
B1.14 Is cause of death included on the death registration form?								
B1.15 If not, is information about the cause of death collected								
at the same time as the death is								
registered but using a different form? Also discuss what								
happens with coronial cases and								
deaths from suspected non-natural causes.								
B1.16 Who decides what details to collect on births and on								
causes of death?								
B1.17 How is medical information on births and deaths								
exchanged among the different								
government agencies involved?								
B1.18 Is this process currently working well or does it need								
improvement?								
B1.19 Is there a national population register?								
B1.20 If so, how does information flow between the national								
population register and the civil								
registration system, and which government agency is								
responsible for maintaining the								
national population register?								
B1.21 Is each individual assigned a PIN at birth registration or								
at the time of receiving identity								
papers, and is this PIN used throughout the government's								
administrative databases?								
B1.22 If a PIN is not given, how are records from various data								
systems linked, and how is the								
population register updated?								
B1.23 Are computers used at any stage of the birth and death								

Questions	Assessment	Improvement	Actions/activ	Time	Responsi	Reso	urce requireme	ent
	findings	goal	ities in sequence	Fram e	bility	HR	Training	Funds
registration process?								
B1.24 Are computers used for any or all of:								
n data compilation?								
n data transmission?								
n data validation?								
n data storage?								
B1.25 Are there any plans for further computerization in the								
near future.								
B1.26 If so, what are the priorities?								
B1.27 What procedures for checking the completeness and								
consistency of information collected								
at points of registration are currently being carried out at the								
points of registration?								
B1.28 What procedures for checking completeness and								
consistency of information are carried								
out at central and other levels?								
B1.29 Are monthly or quarterly registration data routinely								
checked to ensure that they are								
comparable with previous years?								
B1.30 At the central level, are the expected numbers of births								
and deaths that should occur each								
year routinely estimated for each registration area, and								
compared to the actual numbers of								
registered events?								
B2: Review of forms used for birth and death registration								
B2.1 Which of the UN-recommended items are collected on								
birth and death registration forms?								
Use Box 3.2 and tick off all items collected.								
B2.2 Which of the UN-recommended items that are not								
collected on the birth and death								
registration forms would be useful?								

Questions	Assessment	Improvement	Actions/activ	Time	Responsi	Reso	urce requireme	nt
	findings	goal	ities in sequence	Fram e	bility	HR	Training	Funds
B2.3 What additional items are collected on the birth and death registration forms? List and discuss these items. B2.4 Are any medical details collected (either on the birth registration form or a separate form) regarding the health of the child or the birth process? B2.5 Review all the forms used for registering and certifying births and deaths and answer the following questions for each set of forms: Is all the information collected used? In How long does it take, on average, to fill out each set of forms? Is the layout of the forms user-friendly? Explain why or why not. Is the form available in each of the main national languages? Which items come from the "declarant" and which are transcribed from other documents; for example, is the cause of death transcribed from the death certification form?			sequence					
B3: Coverage and completeness of registration				•				
B3.1 What proportion of the population has access to civil registration in the area where they live? Template for assessment

Component D (ICD mortality coding practices)

Questions	Assessment	Improvement	Actions/activities in	Time	Responsibility	Reso	urce require	ement
	findings	goal	sequence	Frame		HR	Training	Funds
D1 – Mortality co	ding practices							
D1.1 Is the ICD used for cause-of-death statistics?	No ICD are used for Couse of death except in some hargaisa Hospital only	ICD should be used for coding causes of deaths at regional levels for health facility death	1-Train Health technicians on how to use ICD10 for cause of death statistics. 2- Provide ICD10 3 volumes at regional and some district levels. Automated coding to be included in Mobile phone notification software. 3- M&E how ICD are used in the country.	2015 to 2016	MOH/WHO	30 medical technician s.	ICD10	75000
D1.2 If so, which revision and edition is currently being used?	No ICD version used currently	To use ICD10 mortality coding practices	Provide ICD10 coding materials at regional and selected districts	2015 to 2016	МОН			
D1.3 Is a national- language version of the ICD used?	No National language version of the ICD available	To use ICD10 national language version	 1- Translate abridged ICD material in to national language. 2- Print and disseminate translated version of ICD 	2015- 2016	МОН			1=85000 2=20,000

Questions	Assessment	Improvement	Actions/activities in	Time	Responsibility	Reso	urce require	ement
	findings	goal	sequence	Frame		HR	Training	Funds
D1.4 Who is responsible for coordinating the implementation of the ICD?	MOH to take responsibility for coordinating and implementation of ICD	MOH to take active steps for coordinating and implementation of ICD10	1. Supervise and monitoring implementation of ICD 2. Assign responsibility of used ICD(HMIS unit and PH sections of MOH)	2015 t0 2016	МОН			
D1.5 Who is responsible for training ICD coders?	At the moment no body responsible to train ICD codes.	Assign HR department and HMIS unit for the training of ICD codes.	 Plan training of ICD for coders. Prepare training materials for ICD coding 	2015 to 2016	МОН			

Questions	Assessment	Improvement	Actions/activities in	Time	Responsibility	Reso	urce require	raining Funds		
	findings	goal	sequence	Frame		HR	Training	Funds		
D1.6 Are the codes selected for cause-of-death reporting chosen from the complete ICD list, or is coding done from a summary tabulation list of the ICD?	No practice exists	MOH to select committee to choose cause of death from the ICD list.	Nominate committee to select cause of death codes from ICD list to create short list or use new WHO short list. Disseminate agree codes of cause of death	2015 to 2016	МОН					
D1.7 If a summary list is used, which list is it?	No summary list at the moment used.	To use selected summery list chosen from the ICD list	Disseminate summery list from the ICD list to all health facilities.	2015 to 2016	МОН					
D1.8 Are coding and ICD selection rules for underlying cause-of-death data applied?	There is no coding ICD selection rules for underline cause of death data applied	Created rules for the selection coding and ICD for the underlying cause of death data applied.	Define rules for the selection coding and ICD for underlying cause of death data applied.	2015 to 2016	МОН					
D1.9 Is mortality coding centralized or decentralized?	No more mortality coding is using	Decentralized mortality coding used in all health facilities	 Provision mortality coding forms in all health facilities. Train health professional of the uses mortality 	2015 to 2016	MOH/HMIS units					

Questions	Assessment	Improvement	Actions/activities in	Time	Responsibility	Reso	urce require	ment
	findings	goal	sequence	Frame		HR	Training	Funds
			coding forms. 3. Supervise mortality coding are implemented					
D1.10 If coding is decentralized, what quality measures and procedures are in place to ensure national consistency in the application of ICD coding rules?	No decentralized or centralized measures are available .	Ensure coding is centralized so that ICD coding rules are applied correctly	Supervise and evaluate how centralized coding and ICD rules are applied	2015 to 2016	MOH/M&E units			
D1.11 Is cause-of-death coding done from a copy of the original death certificate or from a transcribed list provided by the civil registration office, or from some other summary document?	No coding cause death at the moment	Establish cause of death coding of the original death certificate and civil registration offices	1-To Implemented cause of death coding original death certificate used. 3- Monitor and supervise coding practices	2015 to 2016	MOH/MOI			

Questions	Assessment	Improvement	Actions/activities in	Time	Responsibility	Reso	urce require	ment
	findings	goal	sequence	Frame		HR	Training	Funds
D1.12 Is all the information on the death certificate coded, or only the presumed underlying cause of death?	No coded information for death certificate	All Death certificated should be coded	Death certificates be printed and provided to all health facilities and local government civil registration offices.	2015 to 2016	MOH/MOI			
D1.13 Is there an established mechanism to query the certifier (doctor) in cases where the coder cannot understand or interpret the reported causes of death on the certificate?	There is no mechanism to query certifier	Establish mechanism to query certifier doctors	Establish regulation query the certification of death certificates. 2.	2015	MOH/HMIS unit			
D1.14 If so, please describe these procedures and discuss their efficacy. D2: Mortality coder	There is no procedure qualification and train	Establish procedures to query the certifier	Develop procedures to query the certifier	2015 to 2016	MOH/HMIS unit

n sex, age and								
subregion.								
E2.5 Are standard	N/A							
WHO age groups								
used to tabulate								
mortality and cause-								
of-death data?								
E2.6 What is the	N/A							
smallest subnational								
level used for								
tabulating vital								
statistics? Is this								
appropriate given the								
potential uses for								
disaggregated data?								
E2.7 Are any of the	N/A							
four standard								
mortality tabulation								
lists suggested by the								
ICD used for data								
presentation								
purposes?								
E2.8 If not, which	N/A							
condensed list is								
used? How was this								
list derived?								
E2.9 Are data	N/A							
compiled into 10								
leading causes								
(separately for men								

Questions	Assessment	Improvement goal	Actions/activities in	Time	Responsibi	Resource requirement		
	findings		sequence	Frame	lity	HR	Training	Funds
and women and								
children)?								
E2.10 From which list	N/A							
are the 10 leading								
causes selected?								
E2.11 Are ill-defined	N/A							
causes included in								
the ranking as a								
category?								
E2.12 What	N/A							
proportion of deaths								
is accounted for by								
the 10 leading causes								
of death?								
E3: Data access and dis					1	l		
E3.1 Who are the	All line ministries							
main users of the	and ministry of							
vital statistics:	Finance							
n within								
government?								
n outside the								
government?								
E3.2 Is there an	No							
engagement strategy								
to regularly discuss								
data needs with the								
main data users?								
If so, describe this.								
E3.3 Is it possible to	The incident of							
provide an example	diarrhea so it has
