LOS of Different Patients Profiles

According to Risk Factors
- CKD
- HTN
- DM
- Cancer/Immodedeficiency
- Age≥65
- Patients ≥1 comorbidity
- Patients ≥2 comorbidity
- Cardiac diseases
- CRD
- Smoking
- Age<65
- Patients without comorbidity

According to Outcomes
- Critical
- Non-critical

Median LOS(Days)

CKD=chronic kidney diseases; HTN=hypertension; DM=diabetes mellitus; CRD=chronic respiratory diseases

Figure 3. Median length of in-hospital stay (LOS) for a total of 648 COVID-19 patients according to different risk factors and outcomes.
