

Table 2 Median levels of maternal-specific IgG antibodies and seropositive rate against measles, mumps, and rubella among infants born to mothers having a history of hypertension during pregnancy and those born to healthy mothers (*n* = 566)

Virus	Median maternal-specific IgG level in infants (IU/mL)			% of infants seropositive		
	Born to mothers with hypertension in pregnancy	Born to healthy mothers	<i>P</i> -value	Born to mothers with hypertension in pregnancy	Born to healthy mothers	<i>P</i> -value
Measles	3.5	5.2	> 0.05	52.7	72.6	< 0.001
Mumps	165.1	270.8	> 0.05	62.6	84.6	< 0.001
Rubella	157.8	374.8	> 0.05	51.1	59.5	< 0.001
