ī	tom	No of facilities (n	0/-	
	Table 1 Performance indicators of childhood vaccine-prevental acilities in Jeddah	ole diseases surveillance syste	em at health	

Item	No. of facilities (n = 33)	%
Presence of surveillance manual		
Reported (yes)	19	57.6
Observed (yes)	19	57.6
Case detection and registration Clinical registry		
Reported (present)	25	75.8
Observed (correct filling of registers)	20	60.6
Presence of vaccine-preventable diseases standard case definition		
Reported (yes)	18	54.5
Observed (yes)	19	57.6
Ability to confirm cases Ability to collect sputum sample:		
Reported (yes)	25	75.8
Observed (presence of collection materials)	20	60.6
Ability to collect stool sample:		
Reported (yes)	23	69.7
Observed (presence of collection materials)	17	51.5
Ability to collect blood or serum sample:		
Reported (yes)	25	75.8
Observed (presence of collection materials)	16	48.5
Ability to collect CSF sample:		
Reported (yes)	8	24.2
Observed (presence of collection materials)	8	24.2
Capacity to handle all samples:		
Reported (yes)	15	45.5
Observed (presence of working cold-chain)	20	60.6
Observed (presence of transport media for specimens)	14	42.4
Observed (presence of packing material for shipment of		
specimens)	16	48.5
Data reporting	10	10.5
Lack of appropriate surveillance forms in last 6 months	12	36.4
Last monthly report agreed with the register for:		
Disease targeted for eradication (poliomyelitis)	11	33.3
Disease targeted for elimination (measles)	11	33.2
Epidemic-borne disease (meningitis)	12	36.4
Disease of major public health importance (meningitis)	12	36.4
Correct number of weekly reports in last 3 months	9	27.3
Correct number of monthly reports in last 3 months	13	39.3
All weekly reports submitted on time in last 3 months	9	27.3

Description by place 11 33. Description by time 13 39. Description by line graph 4 12. Presence of action threshold for a country-priority disease (reporting) 9 27. Presence of action threshold for a country-priority disease (poliomyelitis) 6 18. Presence of action threshold for a country-priority disease (measles) 5 15. Presence of action threshold for a country-priority disease (measles) 5 15. Presence of demographic data 5 15. Presence of case management protocol for 1 epidemic-prone disease 19 57. Presence of case management protocol for 1 epidemic-prone disease 19 57. Presence of at least 1 feedback report from higher level during the last year 8 24. Presence of surveillance supervision report in the last 6 months Presence of surveillance supervision report in the last 6 months Fraining Staff received training on disease surveillance and epidemic management 22 66. Resources available 5 21 63. Computer 18 54.	tem	No. of facilities (n = 33)	%
