

Table 2 Total population exposed to risk of anthroponotic cutaneous leishmaniasis (CL) in the intervention and control populations in Sedeh and Shiraz cities combined

Sector	No. of people with		Total no. of people exposed	RR (95% CI)	Efficacy (%)
	CL	No CL			
Intervention	2	3810	3812	0.02	98
Control	117	3698	3815	(0.00–0.07)*	

* $P < 0.05$.

RR = relative risk; CI = confidence interval.
