

Table 2 Odds ratio (OR) for *Chlamydia trachomatis* infection in cases with CIN after adjustment for other risk factors

Risk factor adjusted for:	Adjusted OR (95% CI)
First sexual contact < 20 years	5.4 (2.3-12.7)
First pregnancy \leq 16 years	5.0 (2.1-11.5)
Multiparity	5.1 (2.2-10.9)
History of abortion	4.5 (1.9-10.5)
History of genital infection	5.0 (2.2-11.1)

CIN = cervical intraepithelial neoplasia; CI = confidence interval.
