

**Table 1 Number of participants positive for type 2 diabetes mellitus by the risk-score questionnaire and capillary blood glucose screening (CBG) compared with laboratory-confirmed fasting plasma glucose (FPG) (*n* = 15 082)**

Screening tool (cut-off)	No. positive	%
ADA risk score ( $\geq 10$ points)	9 919	65.8
CBG (fasting $\geq 100$ mg/dL or random $\geq 140$ mg/dL)	10 761	71.3
FPG ( $\geq 126$ mg/dL)	3 052	20.3
FPG (100-125 mg/dL)	5 108	33.9

*ADA = American Diabetes Association.*
