

Table 4 Flow analysis of time spent from complication occurring until blood transfusion was completed for patients who received immediate transfusion of blood (n = 13)

5 h 29 min	34 min	1 h 59 min	14 min	20 min	1 h 52 min	7 min	50 min	39 min	56 min
Time from complication occurring	Time from complication occurring until patient's decision to seek care	Time from decision to seek care until patient reached hospital	Time from arrival to registration	Time from registration until patient examined	Time from examination until need for blood was established	Time from need for blood decided until order for blood made	Time from order for blood made until it arrived	Time from blood arrival until it was administered	Time from transfusion started until it was completed
Time from delivery or start of complaint until reaching hospital: 8 h 2 min					Time from examination until blood was administered: 3 h 28 min				
			Time from complication occurring until patient was examined: 3 h 7 min						
Time from complication occurring until blood transfusion started: 6 h 15 min
