

Table 4 Distribution of neonatal birth weight by history of maternal iron/folic acid supplementation and maternal passive smoking exposure

Iron/folic acid supplement/exposure	No. of neonates	Mean (SD) birth weight (g)	t-value	P-value (2-tailed)
<i>Supplements</i>				
Non-exposed	68	3378 (566)	3.035	0.003
Exposed	70	3094 (534)		
<i>No supplements</i>				
Non-exposed	82	3309 (561)	2.365	0.019
Exposed	80	3097 (583)		

SD = standard deviation.
