

**Table 2 Mean and inter-quartile range (IQR) of pollutant level and odds ratio (OR) for low birth weight during the whole pregnancy period**

| Pollutant                                     | Pollutant level |      | OR (95% CI)      | <i>P</i> -value |
|---|-----------------|------|------------------|-----------------|
|   | Mean (SD)       | IQR  |                  |                 |
| CO (ppm)                                      | 4.5 (0.9)       | 0.8  | 2.08 (1.70-4.6)  | 0.03*           |
| PM <sub>10</sub> ( $\mu\text{g}/\text{m}^3$ ) | 48.6 (6.4)      | 2.2  | 0.63 (0.40-1.14) | 0.14            |
| SO <sub>2</sub> (ppb)                         | 33.0 (17.3)     | 12.5 | 1.20 (0.93-2.85) | 0.53            |
| NO <sub>2</sub> (ppb)                         | 63.0 (11.4)     | 10.5 | 1.10 (0.63-1.92) | 0.72            |
| O <sub>3</sub> (ppb)                          | 18.5 (5.5)      | 1.7  | 1.75 (0.83-3.70) | 0.14            |

\*Significant at  $P < 0.05$ .

SD = standard deviation; CI = confidence interval; ppm = parts per million; ppb = parts per billion.
