

Table 2 Trachomatous trichiasis (TT) status of participants' eyes at examination and history of lid surgery for TT, by blindness status (n = 8191 eyes)

Variable	Blind (vision < 3/60)		Not blind (vision ≥ 3/60)		OR (95% CI)
	No.	%	No.	%	
TT absent					
Surgery history -ve (never had TT)	589	7.7	7074	92.3	
Surgery history +ve (successfully managed)	11	4.8	216	95.2	1.64 (0.89-3.00)
Subtotal ^a	600	7.6	7290	92.4	
TT present					
Surgery history -ve (new cases)	11	7.1	143	92.9	2.19 (0.74-6.45)
Surgery history +ve (recurrence)	5	3.4	142	96.6	
Subtotal ^a	16	5.3	285	94.7	
Eyes examined for TT	616	7.5	7575	92.5	

Data presented are numbers and % of eyes examined.

^aOdds of having blindness among eyes with TT now compared to eyes without TT at present: OR = 1.47, 95% CI: 0.88-2.44.

OR = odds ratio; CI = confidence interval.
