

Table 2 Comparison of mean optical density from filariasis commercial antibody detection kit CELISA® test among schoolchildren in the study villages in Menoufiya Governorate, Egypt

Village	Optical density	
	Mean	SD
Village A (<i>n</i> = 212)	0.314	0.10
Village B (<i>n</i> = 476)	0.251	0.07
Village C (<i>n</i> = 633)	0.253	0.03

F = 66.0, *P* < 0.001.

n = number of samples tested; *SD* = standard deviation.
