Supplemental Figure 1. Haemoglobin vs ferritin in low ferritin individuals by sex

Anaemia in low-Ferritin Females

![Graph showing blood ferritin concentration vs hemoglobin concentration for females. The graph is a scatter plot with two clusters: one for no anaemia and one for anaemia.]

Anaemia in low-Ferritin Males

![Graph showing blood ferritin concentration vs hemoglobin concentration for males. The graph is a scatter plot with two clusters: one for no anaemia and one for anaemia.]

- Blood Ferritin Concentration (ng/ml)
- Hemoglobin Concentration (g/dl)
- No Anaemia
- Anaemia
