Figure 2: Flow chart of study participation

Delivered Family Questionnaires 4022

Returned Questionnaires 3003

Eligible* Questionnaires 2382

Delivered Child Questionnaires 4022

Students present on survey date 3580

Weight and height measurement done 3518

Parent-child dyads 2082

Parent-child dyads occupied in the analyses 2066

3 schools (total 16 surveys) were discarded because of selection bias (response rates were very low and mostly only obese students’ parents participated)

*Questionnaires had at least 10 items filled by participants were kept in the study. If more than 90% of items were empty then they were discarded.
