Figure 1: Study plan of June 2015 patients with heat-related illness

Study plan

Patients with Heat Related Illness

Excluded: heat illness other than heatstroke
n=40 (9.75%)

Excluded: incomplete records
n=18 (4.39%)

Excluded: brought dead
n=37 (9.02%)

Study population with heatstroke
n=315 (76.82%)

Survivors (n=242)

Discharged from ER (n=108)

Discharged after admission (n=134)

Non-survivors (n=73)

Died in ER (n=47)

Died after admission (n=26)
