

Table 1 Attitude of the two groups of participants, non-users (n = 109) and women who had discontinued use of family planning (FP) (n = 391), in regard to future use of contraception

Attitude/intention	Non-users of FP (n = 109)		Discontinued using FP (n = 391)		χ^2	P
	No.	%	No	%		
Intend to have children in future	56	51.4	140	35.8		
Intend to use FP in future	31	28.4	225	57.5	35.64	0.0001
Will not use in future	22	20.2	26	6.7		
Intended timing for using FP in future	(n = 31)		(n = 225)			
Within 1 year	10	32.3	115	51.1	3.16	0.076
More than 1 year	21	67.7	110	48.9		

*Significant at P < 0.05.
