Highlights

- **Number of reporting sites:** One hundred and thirteen (113) reporting sites (87% of the total EWARN reporting sites) including seventy-one (71) in internally displaced people’s (IDPs) camps, five (5) in refugee camps and thirty-seven (37) mobile clinics submitted their weekly reports completely and in a timely manner.

- **Total number of consultations in Week 38:** 41,523 (Male=18,588 and Female=22,935) marking an increase of 19,782 since last week, (Total consultations in Week 37: 21,741).

- **Leading causes of morbidity in the camps:** Acute respiratory tract infections (ARI) (n=17,724), acute diarrhoea (AD) (n=2,605) and skin diseases (n=1,107) remained the leading causes of morbidity in all camps and areas hosting displaced populations served by mobile clinics during the reporting week.

- **Number of alerts in Week 38:** Ten (10) alerts were generated through EWARN. Eight alerts were reported from IDPs camps and two from refugee camps during this week. The alerts were investigated within 72 hours, of which eight were verified as true and two false. They were responded by the relevant health cluster partners. (Details: see Alerts and Outbreaks Section).

**Distribution of total consultations in the camps by age and gender (Week 38, 2016)**
Morbidity Patterns

IDPs camps:

During Week 38, the proportions of acute respiratory tract infections (ARI), acute diarrhoea and skin infestations, including scabies, in IDP camps decreased (see Figure II).

Refugee camps:

During Week 38, the proportions of acute respiratory tract infections (ARI), acute diarrhoea and skin infestations including scabies indicated a slight decrease from the previous week (see Figure III).
Distribution of the common diseases by proportion and location for IDPs camps

Figure IV below indicates the proportions of acute respiratory tract infections, acute diarrhoea and skin infestations, including scabies, which comprises the highest leading causes of morbidity in camps for internally displaced persons for Week 38, 2016.

**Trends of S. Pertussis**

From Week 1 to Week 38, 112 suspected pertussis cases were reported through the EWARN in Iraq in 2016. In Week 38, MSF-CH clinic in Abu Ghabir in Baghdad, Kerkh DOH reported two cases, Alrahma clinic operated by UIMS in Salah Addin reported two cases and Debaga mobile clinic running by IOM in Erbil DOH reported one case.

Salah Addin reported 95 suspected cases of pertussis (85%); Sulaimaniya reported seven cases (6%), Anbar reported four cases (4%); and Baghdad Kerkh Qadiisya and Erbil reported two cases (2%) each during the period from Week 1 to Week 38 in 2016.

Trends of waterborne diseases in IDPs and refugee camps

Figures VIII and IX below show a decreasing trends of waterborne diseases (acute diarrhoea, acute bloody diarrhoea and acute jaundice syndrome) reported from camps for internally displaced persons and refugee camps.

![Trend of waterborne diseases from IDPs camps, Week 6-38, 2016](image1)

![Trends of waterborne diseases from refugee camps, Week 6-38, 2016](image2)

Trends of Acute Diarrhoea

Figure X below shows the trends of acute diarrhoea reported in the period from Week 1 to Week 38 in 2015 and 2016 through the EWARN system. The total reported cases of acute diarrhoea were 74,221, of which 54% were less than five years old. Around 51% of the reported cases were males. This week showed an increasing trend of the diseases compared to the last three weeks. In 2016, Anbar reported 36% of total reported AD cases, followed by Dohuk with 21%, Ninewa 11%, Sulaymaniyah 9%, Erbil 8%, Kirkuk 5%, Baghdad 4%, and Salahuddin 3%.

Anbar reported 26543 cases in total from Week 1 to Week 38 in 2016. 49% of all cases were females. 46% of all cases were children less than 5 years old. In Duhok, out of the 15046 reported cases, 48% were female and 67% were less than 5 years old.

Ten alerts were generated through EWARN according to defined thresholds. Eight were from IDPs camps and two from refugees camp. All alerts were investigated within 72 hours. Eight alerts were verified as true and responded to by the Departments of Health, WHO and the relevant health cluster partners. (please see Alert and Outbreaks table below).
