Summary
New cVDPV2 cases this week: 4
Total number of cVDPV2 cases: 27
Outbreak grade: 3

Index case
Onset of paralysis: 3 March 2017
Location: Mayadeen district, Deir Ez-Zor
Age: 22 months
Vaccination status: 2 OPV doses/zero IPV

Most recent cases
Mayadeen district, Deir Ez-Zor
Onset of paralysis: 6 June 2017, age: 8 months, vaccination status: 1 OPV/zero IPV
Tell Abyad district, Raqqa
Onset of paralysis: 25 April 2017, age: 97 months, vaccination status: 3 OPV/1 IPV

Affected districts
Mayadeen and Tell Abyad districts

Immunization response
Two rounds planned for Deir Ez-Zor and Raqqa. First rounds in both governorates are expected to commence 22 July.

Characteristics of the cVDPV2 cases
Median age: 15 months
Gender ratio male-female: 1:2
Vaccination status of the cases:
- IPV: 4 cases (15%) received IPV
- OPV: 30% zero dose, 48% have received 1-2 doses

Distribution of non-polio AFP (NPAFP) and vaccine-derived poliovirus type-2 (VDPV2), Deir Ez-Zor and Raqqa governorates, 2017

Data as of 18 July 2017
governorate since the beginning of 2017 is 87 (66 from Mayadeen, 10 from Deir Ez-Zor, and 11 from Boukamal districts). Raqqa governorate has reported 14 AFP cases (6 from Raqqa, 7 from Tell Abyad, and 1 from Thawra districts).

**Immunization response activities**

Two immunization rounds are planned for July and August targeting children <5 years of age in Deir-Ez-Zor and Raqqa governorates. The southern part of Shadadi district in Hasakah governorate is also included and will be covered by Deir-Ez-Zor teams.

**First round—Deir Ez-Zor**

- Vaccine: mOPV2, total target: 328,000 (196,000 resident children and 110,000 refugee and IDP children in Deir-Ez-Zor governorate, and 22,000 children in Shadadi).
- A total of 355 vaccination teams and 61 supervisors are on standby for this activity. Campaign strategy is house to house in the affected villages and fixed posts in other areas. There are 5 vaccine distribution centers with adequate cold chain in Boukamal, Hajien, Husienieh, Mayadeen, and Sor.

**First round—Raqqa**

- Vaccine: shipping of mOPV2 from Damascus scheduled for this week, total target: 120,000 (109,500 resident children and 10,500 IDP children.
- 100 locally selected vaccination teams and 21 team supervisors will implement the campaign. There are 2 vaccine distribution centers with adequate cold chain in Tell Abyad hospital and Tabqa health center.

**Coordination and surge support**

- WHO-UNICEF joint EOCs in both Damascus and Gaziantep hubs in collaboration with partners continue to monitor the outbreak situation, exchange information, and coordinate preparations for the response.
- WHO and UNICEF have deployed additional human resources (surge support) to both hubs since the start of the outbreak.

**Communications for Development (C4D) and social mobilization activities**

**Deir Ez-Zor**

- 250 mobilizers—largely university students, male and female—have been engaged in the dissemination of campaign material in public places. Campaign posters were placed at markets, village entrances and main roads. Campaign date announcements have been made via bakeries: 6 shops in Boukamal and 4 in Mayadeen.
- Training of campaign C4D zonal leaders, and Mayadeen, Boukamal and Hajien vaccinators took place 12-14 July. The workshop was also attended by social mobilization teams from Deir-Ez-Zor, and Maadan in Raqqa. Work plans were produced and a guide for vaccinators and health educators was made available in Arabic, to participants.
- Door-to-door sensitization visits and community meetings started 15 July. A radio public service announcement on campaign dates began airing the same day. A radio dialogue featuring a Q&A on polio vaccine and campaigns has been prepared.
- Data collection on vaccine acceptance and reasons for refusal started on 15 July. A team of 12 data analysts in Deir-Ez-Zor will analyze data after reports are collected from different locations. Strategies for addressing refusals are being developed which will guide field teams on how to record, track and follow up on refusal cases to ensure no children are missing.

**Raqqa**

- Social mobilization micro-plans have been drafted and activities are expected to start one week before the immunization round.
- Campaign print materials have been delivered to Hasakah. Other C4D materials including campaign t-shirts carrying C4D messages, to be used by vaccinators, are being prepared. Twenty-five megaphones will be sent to Raqqa via Hasakah for use in the second round.
- A radio PSA is being developed for airing.
Vaccine management

Vaccine has been distributed to six distribution centers in Deir Ez-Zor as follows:
