AFP: Stool samples were collected from the AFP case and sent to the reference lab in Damascus. The new round of vaccination campaign has been implemented between 15th and 19th of June.

Measles: the measles vaccination campaign has been implemented starting from 15 till 23 June 2014; this is in addition to supporting of routine vaccination programs. Further outreach by health partners to better respond to this outbreak is required.

AWD: Stool samples were collected from the AWD case and tested for vibrio Cholera. The lab result was negative.

Typhoid and other water borne diseases: a mass media campaign to raise population awareness on simple method for water decontamination, safe food handling and hand hygiene . The camping is expected to be launched in the third week of Ramadan and will continue using different communication channels.

Meningitis: Meningitis cases detected are not clustered. Cases were managed properly; and investigation forms were filled for some cases but not all; it shows that most of the cases are viral meningitis not bacterial. Preventive therapy was provided as necessary for contacts of the probable bacterial meningitis cases.

BD: cases are not clustered. All cases were managed properly.

Other response measures were also taken with regard to case management of Leishmaniasis, Hepatitis, TB and BRU cases. In addition to ensuring the availability of medicines and the implementation of sanitation measures in accordance with available capacity.
