▪ **The Response**

**AWD:** Cases were managed properly but no samples were collected.

**Meningitis:** Meningitis cases detected are not clustered. Cases were managed properly; and investigation forms were filled for some cases but not all; it shows that most of the cases are viral meningitis not bacterial. Preventive therapy was provided as necessary for contacts of the probable bacterial meningitis cases.

**SARI:** 300,000 influenza vaccines were procured to be distributed for high risk groups including Health care workers who are in direct contact with SARI patient in ICU and elderly particularly who have chronic diseases in the IDPs shelters in at health facility level. The vaccines expected to be delivered in end of October 2014.

**BD:** cases are not clustered. All cases were managed properly.
