

global school personnel survey

Country fact sheets

The World Health Organization (WHO) and the Centers for Disease Control and Prevention (CDC), Atlanta, developed the Global School Personnel Survey to track tobacco use among school personnel across countries using a common methodology and core questionnaire. Information from the Survey is compiled within the participating country by a Research Coordinator nominated by the Ministry of Health, and technically reviewed by WHO and CDC. The content has not otherwise been edited by WHO or CDC.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. Saudi Arabia

Global School Personnel Survey (GSPS)

FACT SHEET

The Saudi Arabia GSPS includes data on prevalence of cigarette and other tobacco use as well as information on attitudes on school policy toward tobacco use, access to teaching materials and training, and attitudes toward tobacco use. These factors are components Saudi Arabia could include in a comprehensive tobacco control program.

The Saudi Arabia GSPS was a school-based survey of school personnel from the schools that participated in the 2007 Saudi Arabia GYTS.

The GYTS was conducted in schools having students in 1st, 2nd & 3rd intermediate, and 1st, 2nd & 3rd intermediate (repeat). For the GYTS, a two-stage cluster sample design was used to produce representative data for all of Saudi Arabia. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 95.8%. For the GSPS, 82.1% of the school personnel completed the survey, for a total of 851 teachers & administrators.

Prevalence of Tobacco Use among School Personnel

- 49.9% ever smoked cigarettes (Admin = 63.1%, Teachers = 48.1%)
- 28.3% currently use any tobacco product (Admin = 41.1%, Teachers = 26.5%)
- 22.1% currently smoke cigarettes (Admin = 30.4%, Teachers = 21.1%)
- 19.1% currently use other tobacco products (Admin = 38.7%, Teachers = 16.4%)
- 10.4% smoked on school property in the past year (Admin = 25.0%, Teachers = 8.5%)

School Policies Prohibiting Tobacco Use

- 95.5% agree schools should have policy prohibiting tobacco use among students
- 53.3% report school has policy prohibiting tobacco use among students
- 92.4% agree schools should have a policy prohibiting tobacco use among personnel
- 43.7% report school has a policy prohibiting tobacco use among personnel
- 68.0% report school enforces policies on tobacco use for students and personnel

Access to Teaching Materials and Training

- 52.5% teachers have access to teaching materials on tobacco use
- 11.9% teachers had ever received training on youth tobacco use prevention
- 56.3% schools use non-classroom programs to teach youth tobacco use prevention

Attitudes

- 96.9% think smoke from others is harmful to them
- 95.7% think teacher tobacco use influences youth tobacco use
- 92.3% think tobacco product advertising should be completely banned
- 78.9% think the price of tobacco products should be increased
- 84.9% think the tobacco industry deliberately encourages youth to use tobacco

Highlights

- 28.3% of school personnel currently use any tobacco product; 22.1% currently smoke cigarettes and 19.1% currently use other tobacco products.
- Over half the schools have a policy prohibiting tobacco use among students; more than two in five have a policy for personnel; close to seven in 10 schools enforce their policies.
- More than 1 in 2 teachers have access to teaching materials on tobacco use.
- 11.9% of teachers have ever received training on youth tobacco use prevention.
- Over half the schools use non-classroom programs to teach youth tobacco use prevention.
- More than nine in 10 think teacher tobacco use influences youth tobacco use.
