

# Country fact sheets

The World Health Organization (WHO) and the Centers for Disease Control and Prevention (CDC), Atlanta, developed the Global Youth Tobacco Survey to track tobacco use among youth across countries using a common methodology and core questionnaire. Information from the Survey is compiled within the participating country by a Research Coordinator nominated by the Ministry of Health, and technically reviewed by WHO and CDC. The content has not otherwise been edited by WHO or CDC.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. However, the published material is being distributed without warranty of any kind, either expressed or implied. The responsibility for the interpretation and use of the material lies with the reader. # Kuwait (Ages 13-15) Global Youth Tobacco Survey (GYTS)

FACT SHEET . . . . . . . . . . . . .

The Kuwait GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, environmental tobacco smoke exposure (ETS), cessation, media and advertising, and school curriculum. These determinants are components Kuwait could include in a comprehensive tobacco control program.

The Kuwait GYTS was a school-based survey of students in Fourth Intermediate, First Secondary, and Second

Secondary, conducted in 2001. A two-stage cluster sample design was used to produce representative data for all of Kuwait. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 100%, the student response rate was 94.8%, and the overall response rate was 94.8%. A total of 6330 students participated in the Kuwait GYTS.

## Prevalence

22.8% of students had ever smoked cigarettes (Boy = 31.4%, Girl = 14.6%)

21.1% currently use any tobacco product (Boy = 26.4%, Girl = 15.5%)
