

Country fact sheets

The World Health Organization (WHO) and the Centers for Disease Control and Prevention (CDC), Atlanta, developed the Global Youth Tobacco Survey to track tobacco use among youth across countries using a common methodology and core questionnaire. Information from the Survey is compiled within the participating country by a Research Coordinator nominated by the Ministry of Health, and technically reviewed by WHO and CDC. The content has not otherwise been edited by WHO or CDC.

All reasonable precautions have been taken by the World Health Organization to verify the information contained in this publication. Lebanon UNRWA (Ages 13-15) Global Youth Tobacco Survey (GYTS)

FACT SHEET

The Lebanon UNRWA GYTS includes data on prevalence of cigarette and other tobacco use as well as information on five determinants of tobacco use: access/availability and price, exposure to secondhand smoke (SHS), cessation, media and advertising, and school curriculum. These determinants are components Lebanon UNRWA could include in a comprehensive tobacco control program.

The Lebanon UNRWA GYTS was a school-based survey of students in grades 7, 8, and 9 conducted in 2008. A two-stage

cluster sample design was used to produce representative data for all of Lebanon UNRWA. At the first stage, schools were selected with probability proportional to enrollment size. At the second stage, classes were randomly selected and all students in selected classes were eligible to participate. The school response rate was 100%, the class response rate was 100%, the student response rate was 94.6%, and the overall response rate was 94.6%. A total of 1,685 students aged 13-15 participated in the Lebanon UNRWA GYTS.

Prevalence

22.1% of students had ever smoked cigarettes (Boy = 33.0%, Girl = 12.9%)

41.4% currently use any tobacco product (Boy = 48.2%, Girl = 35.8%)

10.6% currently smoke cigarettes (Boy = 16.6%, Girl = 5.5%)

33.7% currently smoke shsisha (Boy =39.0%, Girl = 29.0%)

38.9% currently use other tobacco products (Boy = 44.1%, Girl = 34.6%)

15.6% of never smokers are likely to initiate smoking next year

Knowledge and Attitudes

31.9% think boys and 19.8% think girls who smoke have more friends 23.2% think boys and 16.6% think girls who smoke look more attractive

Access and Availability - Current Smokers

20.3% usually smoke at home

27.8% buy cigarettes in a store

87.2% who bought cigarettes in a store were NOT refused purchase because of their age

Exposure to Secondhand Smoke (SHS)

68.1% live in homes where others smoke in their presence

65.0% are around others who smoke in places outside their home

80.4% think smoking should be banned from public places

67.9% think smoke from others is harmful to them

65.6% have one or more parents who smoke

13.3% have most or all friends who smoke

Cessation - Current Smokers
