*The sum of the measles lab confirmed cases +measles epi-linked cases + measles clinically
compatible cases/million population
**The sum of the rubella lab confirmed cases +rubella epi-linked cases + rubella clinically compatible cases/million population
***Reporting rate of discarded non-measles non-rubella cases at the national level per 100,000 total population
****Excluding measles and rubella epi-linked cases
Countries that did not report

Adequate investigation includes the following data elements:
-District.
-Age. -District. -Age. -Gender. -Date of rash onset, case notification and investigation -Vaccination status. -Date of last vaccination with MCV -Date specimen collected.
-Travel history
