

Saving the Lives of Mothers & Children

Rising to the Challenge

29 August 2013 | Sudan's Federal Ministry of Health together with WHO, UNICEF and the United Nations Population Fund (UNFPA) launched on 28 August 2013 Sudan's National Acceleration Plan for Maternal and Child Health.

Sudan is the first of the 10 high-burden countries in the Region to launch an acceleration plan on maternal and child health, in line with the commitment expressed in the Dubai Declaration, adopted in January 2013.

There has been a significant decrease in the under-5 mortality rate in Sudan, which declined by 33% between 1990 and 2010. The neonatal mortality rate has also decreased by 11% in the same time period.
