Tools

A guide to rapid assessment of human resources for health [pdf 156kb]

Key questions to foster analysis of a country's health workforce situation, as well as tools and information sources for in-depth assessment of HRH.

Assessment of human resources for health: survey instruments and guide to adminstration [pdf 995kb]

This survey instrument was developed by the World Health Organization for collecting quantitative and qualitative information for assessing the human resources for health situation in a country. It is intended to be used for data collection at the national and institutional levels, as well as from individual health care providers. Four questionnaires are included in the tool, focusing on the following areas: regulation of health occupations, training institutions, health care facilities and health care providers. The tool was field-tested in 2002-2004 in six countries: Chad, Côte d'Ivoire, Jamaica, Mozambique, Sri Lanka and Zimbabwe.

Human resource development assessment instrument for nongovernmental organizations and public sector health organizations [pdf 71kb]

Intended as a rapid-assessment tool to identify an organization's characteristics with respect to the core functions of a human resources development system.

Software tool for policy diagnosis and dialogue

This tool seeks to assist health workforce and policy makers in a country think through, diagnose, and stimulate dialogue about their challenges by responding to questions and reflecting on the policy implications of their answers.
