

The Institutional Digital Repository of the Regional Office for the Eastern Mediterranean was launched in October 2011 in order to improve accessibility to, and availability of, documents of WHO governing bodies, the annual reports of the Regional Director, messages and speeches of the Regional Director, technical and intercountry meeting reports and resolutions that represent the work of the Regional Office. The Institutional Digital Repository includes bibliographic data with online access to the full text of more than 11250 official documents published from 1948 until the current day. Its main objective is to share knowledge through a single access point.
