The Regional Office is supporting State Parties to implement the IHR through providing technical advice and conducting regional and sub-regional meetings and training workshops to strengthen national capacities, particularly in the areas of:
coordination among the different IHR stakeholders at national level;
field epidemiology; laboratory quality management systems;
national influenza centres; surveillance and response at points of entry;
ship inspection and issuance of ship sanitation certificates.
Intercountry missions and review exercises are carried out regulary in several countries in the Region.
