A one-week WHO mission to review the national nutrition policy and strategy took place from 2 to 6 February 2013. The team facilitated a 2-day national workshop with key stakeholders from different ministries to identify the appropriate nutrition interventions for Oman. It was noted that all the stakeholders are taking efforts to address food and nutrition issues. Thus, the stakeholders, with technical support from the WHO team drafted a National Nutrition Action Plan, 2013–2017 to consolidate these efforts in order to accelerate action in delivering effective nutrition interventions and improve the nutritional status in Oman.
