

WHO Pakistan is seeking tenders in respect to work on the building, design and construction of a tube well (solar energy-based) and improvement of water supply network and storage at agency headquarters Landi Kotal (Khyber agency, Federally Administered Tribal Areas).

Technical and financial proposals (to be submitted in separate envelopes) are required from approved pumping machinery suppliers. The bid will first be assessed on the basis of technical proposals. The firm should have experience of installing more than 500 water supply schemes in the past 3 years. The firm applying for the tender must have test bed facility to carry out pump performance acceptance test witnessed by third party inspector as per ISO-9906 standard. Each of the offered pump set models must undergo this witness test prior to supply and installation.
