

The Eastern Mediterranean Region is home to 10 countries and 1.9 billion people. It is a region of great diversity, with a wide range of cultures, languages, and religions. The region is also home to some of the world's most vulnerable populations, including children, women, and people living in conflict-affected areas. The Region's health systems are under pressure from a range of factors, including population growth, urbanization, and the impact of climate change. The Region's health systems are also facing a range of challenges, including a shortage of health workers, a lack of essential medicines, and a limited capacity to respond to emergencies.

The Region's health systems are under pressure from a range of factors, including population growth, urbanization, and the impact of climate change. The Region's health systems are also facing a range of challenges, including a shortage of health workers, a lack of essential medicines, and a limited capacity to respond to emergencies. The Region's health systems are also facing a range of challenges, including a shortage of health workers, a lack of essential medicines, and a limited capacity to respond to emergencies.
