WHO EMRO region has reported 1876 cases and 5 deaths. A total of 8,703 cases and 40 deaths have been reported from the region since the beginning of the outbreak. The majority of cases are reported from Iran, which has reported the highest number of cases in the region. The WHO EMRO region continues to monitor the situation closely and is providing technical assistance to member states.

WHO EMRO is providing technical assistance to member states in the region, including Iran, to help them manage the outbreak. This includes providing information on the disease, its transmission, and how to prevent it. WHO EMRO is also providing support for testing, contact tracing, and isolation. The WHO EMRO region continues to monitor the situation closely and is providing technical assistance to member states.
