

WHO Regional Office-supported research grants have been developed to support research for health initiatives in the Member States of the Eastern Mediterranean Region, with a focus on utilizing “research for health” as a tool to promote health and development and to enhance the use of research-based evidence in health policy and planning.

The Research Policy and Development programme currently supports five research grant schemes – “ [Regional Office for the Eastern Mediterranean Special Grant for COVID-19 Research, 2022](#) ”, “ [Migration Health Research](#) ”, “ [Regional Office/Research in Priority Areas of Public Health](#) ”,

“ [Improving Programme Implementation through Embedded Research](#) ”,

in coordination with the “Alliance for Health Policy and Systems Research” based at WHO headquarters, in addition to the “

[Joint Regional Office for the Eastern Mediterranean/Tropical Disease Research small grants scheme for implementation research in infectious diseases of poverty](#) ”,

offered in coordination with the “Special Programme for Research and Training in Tropical Diseases” also based at WHO headquarters.
