

Key updates, 20 December 2018

No new human cases reported from Somalia for three consecutive weeks. The total number of cases remains 12: five cVDPV2 cases, six cVDPV3 cases, and one case with cVDPV2 and cVDPV3 co-infection.

All outbreak response activities for 2018 have been completed; planning is underway to design the 2019 vaccination activities and detail phase two of the outbreak response plan.
