WHO EMRO | WHO continues to support and invest in community-based surveillance system for COVID-19 and epidemic-prone diseases with USAID support | News | Somalia site

USAID and WHO team up to mitigate the impact of COVID-19 on Somalia ------

- 1. People at least 18 years old and with no disqualifying health conditions were eligible for COVID-19 vaccines in Somalia.
- 2. Routine vaccination includes tuberculosis, polio, diphtheria, pertussis, tetanus, Hib pneumonia and meningitis, measles, hepatitis B and pneumococcal pneumonia.
- 3. In addition to fully vaccinating nearly 47% of the eligible population, through this project an additional 11% of the population received at least one dose of a COVID-19 vaccination series, and 28 000 people received booster doses of a COVID-19 vaccination.
