Mogadishu, 9 May 2022 – On 9 May 2022, the World Health Organization (WHO) Regional Director for the Eastern Mediterranean Dr Ahmed Al-Mandhari arrived in Somalia for a 3-day

visit. He was accompanied by the Director of Business and Operations Services of the WHO Regional Office for the Eastern Mediterranean Dr Sussan Bassiri.

The Federal Minister of Health and Human Services HE Dr Fawziya Abikar Nur other high-level government officials and the WHO Representative to Somalia Dr Mamunur Rahman Malik extended a warm welcome to Dr Al-Mandhari, who is visiting Somalia for the second time since 2019. He is visiting Somalia at a time when the country is rolling out an Essential Package of Health Services (EPHS 2020). The development and implementation of the EPHS 2020 is seen as the largest public sector project in the history of Somalia that aims to increase access to health care, improve health services delivery and coverage using the primary health care approach. WHO has supported the development of the EPHS 2020 of Somalia through a broad range of technical support involving its Regional Office and headquarters, which includes a burden of disease analysis costing, as well as design of cost-effective but high-impact interventions to be delivered at different levels of care. The EPHS 2020 will be financed by the World Bank and the Global Financing Facility over the next 5 years over a budget outlay of US\$ 100 million. The EPHS 2020 will be the main driver of the country to achieve universal health coverage.

The WHO country office will continue to support the Ministry of Health and Human Services of the Federal Government of Somalia to roll out the EPHS in the country, as well as the delivery of other impactful interventions to protect health, save lives and build a resilient health systems through its recently developed "Country Cooperation Strategy for WHO and Somalia 2021–2025".

Please see the link below for additional information on the WHO Regional Director's last mission to Somalia, in September 2019, where Dr Ahmed Al-Mandhari launched the country's roadmap to universal health coverage, together with the Federal Minister of Health and Human

Services and WHO Representative to Somalia.
