

The World Health Organization's Regional Office for the Eastern Mediterranean will host the First Scientific Conference on Acute Respiratory Infections (ARIs) in the Eastern Mediterranean Region in Amman, Jordan from 11 to 14 December 2017.

The conference will be held together with the Fourth Meeting of the Eastern Mediterranean Acute Respiratory Infection Surveillance (EMARIS) Network, in collaboration with the Eastern Mediterranean Public Health Network (EMPHNET).

## EMARIS

EMARIS is a network of countries in the Region working together to strengthen and enhance influenza surveillance, improve the use of surveillance data for developing control programmes and for conducting research related to influenza and other respiratory viruses. Meetings of the EMARIS network have been held regularly since 2011 in order to share best practices for influenza surveillance, track progress, and draw important lessons on public health preparedness for pandemic influenza.

The fourth meeting will document progress made in the Region in the areas of surveillance, and response capacity in countries for seasonal and pandemic influenza. Reports from past meetings can be accessed below:

[Summary report on the Third intercountry meeting on the Eastern Mediterranean Acute Respiratory Infection Surveillance network, Amman, Jordan, 14–16 September 2015](#)

[Summary report on the Second intercountry meeting on the Eastern Mediterranean Acute Respiratory Infection Surveillance \(EMARIS\) network, Sharm el-Sheikh, Egypt, 24–27 November 2013](#)

[Summary report on the Intercountry meeting on the Eastern Mediterranean Acute Respiratory Illness Surveillance network, Sharm el-Sheikh, Egypt, 12–13 December 2012](#)

The scientific conference is being held based on the recommendations of the third EMARIS meeting, in September 2015, to dedicate a day for scientific sessions in order to present research findings on the epidemiology, seasonality, and risk factors for influenza that are being generated from the Region.

## **Influenza surveillance background**

Since 2006, the WHO Regional Office has been collaborating with the Influenza Division International Program of the United States Centers for Disease Control and Prevention (CDC), Global Disease Detection Program of the CDC Division of Global Health Protection, the WHO Pandemic Influenza Preparedness (PIP) Framework, and the U.S. Naval Medical Research Unit no. 3 (NAMRU-3) to establish and enhance the surveillance system for influenza-like illness (ILI) and severe acute respiratory infections (SARIs) in the Region. The goal of this collaboration is to enable countries in the Region to collect quality epidemiological and virological surveillance data on influenza and influenza-associated illnesses in a timely and reliable manner with the overarching goal of improving pandemic influenza preparedness. This collaborative effort has been coupled with strong monitoring mechanisms to assess the progress of influenza surveillance in the Region using a set of indicators. At present, 19 of the 22 countries in the Region have implemented SARI and ILI surveillance, with enhanced data collection and analysis attributes. These countries routinely share their ILI and SARI surveillance data with WHO, using [EMFLU](#) – a publicly-available influenza surveillance portal developed by the

Infectious Hazards Management programme in the WHO Health Emergencies Department in the Regional Office. The information shared is being used to develop informed policy decisions regarding effective strategies for prevention and control of influenza in the Region.

## **Objective**

This is the first scientific conference in the Region on ARIs, and the main objective is to share up-to-date scientific information and research findings on disease surveillance, disease burden, aetiology, prevention (vaccination), preparedness, response, and networks on ARIs at national and regional levels. Moreover, the conference aims to encourage junior public health professionals in the Region to improve their research skills.

## **Theme**

The theme of the conference is Better Understanding, Better Preparedness, and Better Response .

## **Scope**

This scientific conference is intended to provide a forum for young health researchers and health professionals in the public, para-public and private sectors throughout the Region to present their latest research findings in the area of ARIs, influenza surveillance, laboratory detection, collaboration at the animal-human interface, and related subjects.

Over 35 abstracts will be presented either as oral or poster presentations, under the following thematic areas:

Respiratory disease surveillance and laboratory capacity

Influenza disease burden

Outbreak investigations and response

Emerging and re-emerging respiratory infections

Influenza vaccination

Pandemic preparedness and response

Influenza at the human-animal interface.

All the scientific proceedings of the conference (abstracts for oral and poster presentations) will be published in a special issue of The Journal of Infection and Public Health, a well-known scientific and peer-reviewed journal in the Region.

## **Keynote speaker**

The keynote speech will be delivered by Professor Salman Rawaf, Director of the WHO Collaborating Centre for Public Health Education and Training, Imperial College, London. He is an adviser to the World Health Organization on primary care, public health, health systems, medical education, and human resources for health development. Professor Rawaf will present his keynote speech on the evening of 11 December 2017.

## **Speakers**

The following speakers will present key findings in the thematic areas of the scientific conference:

Dr Ann Moen

Dr Aspen Hammond

Dr Eduardo Azziz-Baumgartner

Dr Evelyn Basells

Dr Ghazi Kayali

Dr Hanan Al Kindi

Professor Hassan Zaraket

Dr Idris Saleh Al-Abaidani

Dr Isabelle Bergeri

Dr Jacqueline Katz

Dr Jila Yavarian

Dr Kinda Zureick

Ms Maja Lievre

Dr Mussab Al Saleh

Dr Nasir Ahmad Stanikzai

Dr Payman Hemmati

Dr Rod S Daniels

Dr Salah Al Awaidy

Dr Stephen Lindstrom

Dr Teresa Peret

Dr Uzma Bashir

Dr Weigong Zhou

## **Hosts and partners**

The Fourth EMARIS meeting and First Scientific Conference will be hosted by WHO's Regional Office for the Eastern Mediterranean, with the US Centers for Disease Control and Prevention (CDC), and in partnership with Global Health Development (GHD).

## **Venue**

The Fourth EMARIS meeting and First Scientific Conference will be held at Amman Marriott Hotel in Amman, Jordan from 11 to 14 December, 2017.
