

Additional extension for

Monday

Experts and participants mingle at EMARIS 2017 (Photo: WHO).

UPDATE: Abstract submission deadline is extended to 15 July (23:59 GMT)

As the deadline for abstract submission for [EMARIS 2019](#), the Second Scientific Conference of the EMARIS network, approaches (

[deadline for submission](#)

:

Tuesday 25 June,

Monday 15 July, 23:59 GMT

), many researchers have already submitted their best abstracts. For those still preparing, or considering to submit, a quick reminder of the Top 5 reasons to participate in EMARIS 2019.

1. Presenting your research

As abstract (co)author at EMARIS 2019 you will have the opportunity to showcase your research in front of peers and experts in the field of Acute Respiratory Infection. You will improve your public speaking, presentation, and discussion skills, and the positive feedback and constructive criticism from other participants and facilitators will help you take your research to the next level.

2. Networking for future collaborations

Attending EMARIS 2019 will allow you to network with leading academics and experts in your field from around the Region and indeed worldwide, including from the World Health Organization, the U.S. Centers for Disease Control, Morocco's Ministry of Health, the Oman Medical Journal, and many, many more. You will learn about the latest scientific discoveries, advances, and technological breakthroughs, and the mix of cutting-edge experts and young researchers will provide you with access to both deep expertise and knowledge on the one hand, and new ideas and fresh energy on the other.

3. Publication

Accepted abstracts for EMARIS 2019 also qualify for publication in the [Oman Journal of Medicine](#), the medical journal that is published six times a year by the [Oman Medical Specialty Board](#), and distributed free to all medical doctors and allied health professionals in various institutions locally and internationally.

4. Update your expertise and build your skills

Anyone who wishes to survive and excel in an academic discipline must continue to sharpen one's tools, skills and expertise. EMARIS 2019 will keep you updated on the newest developments, as well as provide expert-taught workshops on a range of topics from increasing vaccine coverage, to data quality, scientific writing, threshold calculation, epidemiological analysis of surveillance data, and outbreak investigation techniques.

5. Learn beyond your field or interest

EMARIS 2019 is a great way for serendipitous encounters, and for innovation to spring from unexpected connections and cross-pollination of ideas. All EMARIS 2019 attendees are dedicated to progress in the field of Acute Respiratory Infection, but they have many different (multi- and inter-disciplinary) sub-fields of study. Refresh your mind with new approaches, methods, and ideas.

Convinced that EMARIS 2019 will be an amazing opportunity to present your research and take full advantage of these Top 5 opportunities? Then [submit your abstract today](#) , and we hope to see you in November.
