

**Table 2 Multivariate stepwise logistic regression analysis for prediction of coronary artery disease (CAD)**

Variable	$\beta$ coefficient (SE)	OR (95% CI)	P-value
ST depression $\geq 1$ mm <sup>a</sup>	3.3 (0.8)	27.3 (6.2–60.2)	< 0.001
Peak exercise QTDC > 70 ms	3.8 (0.7)	43.6 (10.3–84.9)	< 0.001
Constant	–9.6 (1.7)	–	< 0.001

<sup>a</sup>Horizontal or downsloping.  
QTDC = corrected QT dispersion; SE = standard error; OR = odds ratio; CI = confidence interval.
