

Table 3 Deaths from MERS-CoV infection, by age group, Saudi Arabia, 2019–2020

| Age group (years) | Deaths (n = 78) | |
|-------------------|-----------------|--------|
| | No. | (%) |
| < 15 | 0 | (0.0) |
| 15–24 | 1 | (1.3) |
| 25–34 | 3 | (3.8) |
| 35–44 | 10 | (12.8) |
| 45–59 | 21 | (26.9) |
| ≥ 60 | 43 | (55.1) |

MERS-CoV = Middle East respiratory syndrome coronavirus.

P = 0.015 by linear-by-linear association.

Note = Five of the people who died did not have their age documented.
