

# Attributes of good practice guidelines and appraisal tools

Arash Rashidian MD PhD
Director of Science, Information and Dissemination

**WORKSHOP ON** 

NATIONAL PROGRAMME FOR GUIDELINE DEVELOPMENT AND ADAPTATION IN EGYPT

CAIRO 23-24 NOVEMBER 2022

### Guideline Effectiveness

 Research has shown that clinical practice guidelines can be an effective means of changing the process of health care and improving health outcomes

(Grimshaw & Russell 1993, EHCB 1994).

## Does quality of guidelines matter?

- There are many examples of low quality guidelines
- Guidelines are developed for a purpose
- They could make life easier or more difficult for the front line staff
- Guideline development is costly to individuals and public

### Attributes of 'good' clinical guidelines (IOM; Field & Lohr, 1990)

- Eight attributes (юм)
  - validity; reliability/reproducibility; clinical applicability; clinical flexibility; clarity;
     multidisciplinary process; scheduled review; and documentation
- Four focused on content, three on process and one on presentation
- Validity and reproducibility were the main attributes

### Guideline's from users' viewpoint (Rashidian, Russell, 2003; Rashidian 2004; Rashidian et al 2008)

# Seven themes that explains why guidelines are used (or not used) in practice:

- Credibility of content
- Credibility of source
- Presentation
- Influential people
- Organisational factors
- Disease characteristics
- Dissemination strategy

### AGREE II attributes

- Domain 1: Scope and purpose
- Domain 2: Stakeholder involvement
- Domain 3: Rigour of development
- Domain 4: Clarity and presentation
- Domain 5: Applicability
- Domain 6: Editorial independence

### **STRUCTURE**

#### Six domains

- > 23 items
- 7-point Likert Scale
- 1. Scope & purpose (3)
- 2. Stakeholder involvement (3)
- 3. Rigour of development (8)
- 4. Clarity & presentation (3)
- 5. Applicability (4)
- 6. Editorial independence (2)

# 2 items for overall assessment

- overall quality of the guideline
- whether the guideline would be recommended for use in practice

# DOMAIN 1. SCOPE AND PURPOSE

- 1. The overall objective(s) of the guideline is(are) specifically described.
- 2. The health question(s) covered by the guideline is(are) specifically described.
- 3. The population (patients, public etc) to whom the guideline is meant to apply are specifically described.

### DOMAIN 2. STAKEHOLDER INVOLVEMENT

- 4. The guideline development group includes individuals from all the relevant professional groups.
- 5. The views and preferences of the target group populations (patients, public etc) have been sought.
- 6. The target users of the guideline are clearly defined.

# DOMAIN 3. RIGOUR OF DEVELOPMENT (1)

- 7. Systematic methods were used to search for evidence.
- 8. The criteria for selecting the evidence are clearly described.
- 9. The strengths and limitations of the body of evidence are clearly described
- 10. The methods for formulating the recommendations are clearly described.

## DOMAIN 3. RIGOUR OF DEVELOPMENT (2)

- 11. The health benefits, side effects and risks have been considered in formulating the recommendations.
- 12. There is an explicit link between the recommendations and the supporting evidence.
- 13. The guideline has been externally reviewed by experts prior to publication.
- 14. A procedure for updating the guideline is provided.

# DOMAIN 4. CLARITY AND PRESENTATION

- 15. The recommendations are specific and unambiguous.
- 16. The different options for management of the condition or health issue are clearly presented.
- 17. Key recommendations are easily identifiable.

# DOMAIN 5. APPLICABILITY

- 18. The guideline describes facilitators and barriers to its application.
- 19. The guideline provides advice and/or tools on how the recommendations can be put into practice.
- 20. The potential resource implications of applying the recommendations have been considered.
- 21. The guideline presents monitoring and/or auditing criteria.

# DOMAIN 6. EDITORIAL INDEPENDENCE

- 22. The views of the funding body have not influenced the content of the guideline.
- 23. Competing interests of guideline development group members have been recorded and addressed.

## **RESPONSE SCALE**

1	2	3	4	5	6	7
Strongly						Strongly
Disagree						Agree

### CALCULATING DOMAIN SCORES

Standardised guideline domain scores are calculated by:

summing up all the scores of individual items in a domain

#### and

✓ by standardising the total as a percentage of the maximum possible score for that domain

## **OVERALL ASSESSMENT (1)**

#### 1. Rate the overall quality of this guideline.

1 Lowest possible 2 3 4 5 6 Highest possible quality

#### 2. I would recommend this guideline for use.

Yes	
Yes, with modifications	
No
