Objectives of the Yemen Nutrition Surveillance System

Monitor children nutritional status, early detection of malnutrition and case referral. Share information and trigger alert verification..

Methodology

Nutritional assessment in NSS is normally performed through the measurement of child's weigh,height/length, MUAC, age,hemoglobin level, breastfeeding status and oedema.It is Facility-based surveillance system, established mainly in district hospitals across the country.

The system provides proportion of children under five years found suffering from any forms of malnutrition, out of the total children screened. It is not a formal survey using sampling methods to produce representative results.

The results only reflect the status of children who have attended the health facility in the month under review.The system tracks Global core nutrition indicators: Stunting, Wasting, Exclusive breastfeeding and Anemia.This bulletin is based on reports received by the health facility surveillance MoPHP teams*.

WHO supports the MoPHP and constantly works to expand coverage and improve data quality, funded by World Bank.

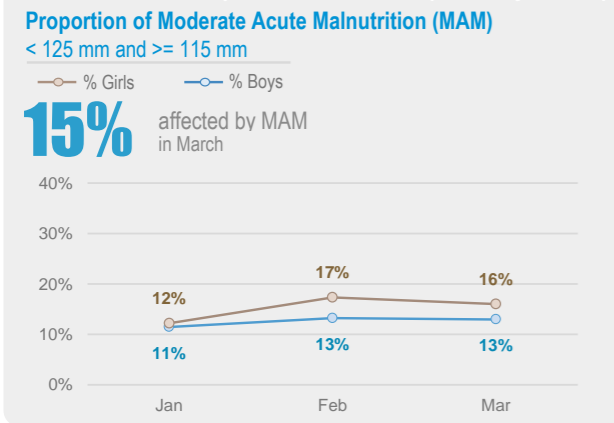

To ensure that children in remote areas were also assessed, additional screening of 9,181 children was conducted via mobile teams. Children found to have malnutrition are referred to the nearest nutrition services to continue treatment and follow-up.

Summary for Nutrition Indicators Mar 2024 in Reporting Gov

| Governorate | # of Screened Children (0 - 5) | # of Screened Children (6 - 59) | Proportion of GAM (0 - 5) | Acute Malnutrition by Z- Score | | | | Acute Malnutrition by MUAC | | | | Underweight | | Stunting | | Exclusive Breastfeeding | | Anemia | | Oedema | |
|------------------|--------------------------------|---------------------------------|---------------------------|--------------------------------|-------------------|----------|-------------------|----------------------------|-------------------|----------|-------------------|------------------|----------------------------|---------------|------------------------|-------------------------|-------------------------|-------------|----------------------|-------------|----------------------|
| | | | | # of MAM | Proportion of MAM | # of SAM | Proportion of SAM | # of MAM | Proportion of MAM | # of SAM | Proportion of SAM | # of Underweight | Proportion of Under weight | # of Stunting | Proportion of Stunting | # of EBF | Proportion of EBF (Yes) | # of Anemia | Proportion of Anemia | # of Oedema | Proportion of Oedema |
| Al Bayda | 766 | 2,962 | 11.6% | 322 | 11% | 138 | 5% | 305 | 10% | 87 | 3% | 1,227 | 33% | 1,013 | 34% | 142 | 17% | 335 | 16% | 0 | 0.0% |
